

AGILY

YOU HAVE TOTAL CONTROL
OVER CHANGE

AGILITY: THE SECRET TO YOUR PRESENT AND FUTURE SUCCESS

A constantly changing offer, to keep abreast of market evolution. Agily accompanies you towards the future.

In the vending industry, the ability to change at the right time, intercepting new consumer trends, is the secret to lasting success. Agily offers you the chance to quickly adapt to any changes, because you can update your offer at any time by adding tempting specialities to the menu, giving users greater choice, making interaction with the machine more enticing. Take a leap towards the next opportunity, tempt your clients with new proposals and continue to develop your business: with Agily you have total control over change.

Agily is a competitive advantage that can be measured over time: while others are forced to change their machines, all you have to do is update yours.

The pleasure of being surprised is a vending machine capable of “perceiving” users’ desires and responding to them.

THE DIFFERENCE IS IN THE DETAIL

Dynamism, versatility, customisation, sophisticated details: Agily even takes style in unexpected directions.

- 01 Two interfaces to choose from. Offer the utmost interaction with the 21” touchscreen: clear and intuitive menus, product videos and other useful consumer information. Or you can aim for simplicity with the Smart interface: 25 backlit buttons and a 7” touchscreen dedicated to drink personalisation and information on the product dispensed.
- 02 Sheet-metal door with integrated touchscreen in the upper section, ample surfaces to personalise with stickers in the lower section and in the side area where the coin slot and payment systems are located.
- 03 Revolutionary design with inclined lines and asymmetrical parts for a striking look and feel. Quality materials and attention to detail, with “diamond” shaped corners with a mirror finish to create contrast with the brushed effect of the aluminium frame.
- 04 Soft-closing dispensing area door.
- 05 Ergonomic door handle integrated into the aluminium frame.

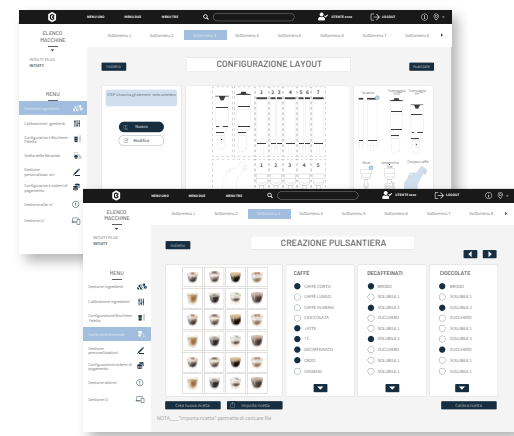

EASY CONFIGURATION MAINTENANCE INTERACTION

EASY CONFIGURATION

Physical Thanks to the new modular electronic architecture with easy connection and automatic recognition of modules, configuration is simple, and you have a wide range of options for creating the machine you need: you can insert up to two coffee hoppers, create different combinations of soluble product, choose between the second cup or topping kits, and offer two different types of sugar.

Digital With the new BI-Creator software, you can set up Agily's menus and recipes quickly and easily. The drag-and-drop navigation system is intuitive, and the guided process lets you save time by configuring only what you really need: in accordance with your requirements, you can choose from the preloaded libraries or customise your offer.

BI-CREATOR

EASY MAINTENANCE

Physical The structure of the machine has been designed to offer the utmost freedom of movement. All the modules are easy to remove for cleaning, and the containers can be hung up for easier filling. With the new automotive-based electronic platform, the machine can monitor its own status and will guide you in solving any problems.

Digital Agily is so advanced that in the future it will be able to communicate with third-party apps, for example allowing for the integration of data recorded by the machine with any IoT platform. This means you will be able to foresee and optimise maintenance operations, reaching even higher levels of efficiency.

EASY INTERACTION

Physical A 21" touchscreen for a multimedia experience or a Smart interface for simple interaction. Entice your clients with promotional offers, product information and a wide range of opportunities to personalise drinks.

Digital In order to have full control over change, you need to have the right instruments now, to take your machine to the future of vending. Agily's native API system will allow you to render the consumer experience even more rewarding via third-party apps such as weather information, news, user profiling systems and voice-commanded assistants.

Agily L and M, agility in format, agility in the choices for evolutions in vending.

Is your machine perfect for you? Of course! It is Agily, and it adapts to all your needs! You can choose the Smart version of Agily L, with a backlit interface panel or a 21" touchscreen for increased interaction. If you are looking for a more compact machine, there is Agily M, again available in Smart or Touchscreen versions. Thanks to Agily's excellent modularity, you can also set up the machine in accordance with your goals, and naturally change it as you go, whenever and however you want: you can offer two varieties of coffee and sugar, have up to ten containers for soluble products, choose the second cup kit to offer more drink formats, or the topping dispenser kit for even tastier menus.
